Data Preparation

1. NaN 3
    a. What is NaN? 5
    b. Problem of NaN 6
    c. Check NaN 7
    d. Listwise Deletion 8
    e. Code 9
    f. Further Reading 13
2. Outlier 15
    a. What is Outlier? 17
    b. Effect of Outliers 19
    c. Check Outliers 20
    d. Remove Outliers 21
    e. Code 22
    f. Further Reading 26
3. Feature Encoding 28
    a. Type of Data 30
    b. Ordinal Encoding 37
        i. What is Ordinal Encoding? 38
        ii. How to define number 39
        iii. Example 40
        iv. Code 42
    c. One Hot Encoding 46
        i. What is One Hot Encoding 47
        ii. Example 48
        iii. Code 51
4. Feature Scaling 56
    a. What is Feature Scaling 58
    b. Why need Feature Scaling 60
    c. Standardization 63
        i. What is Standardization? 64
        ii. Formula 65
        iii. Step to Calculate Standardization 66

iv. Example 67
v. Code 71
d. Min-Max Scaling 75
i. What is Min-Max Scaling? 76
ii. Formula 77
iii. Step to Calculate Min-Max Scaling 78
iv. Example 79
v. Code 83
e. Conclusion 87
